Detroit Diesel Engine Specialist

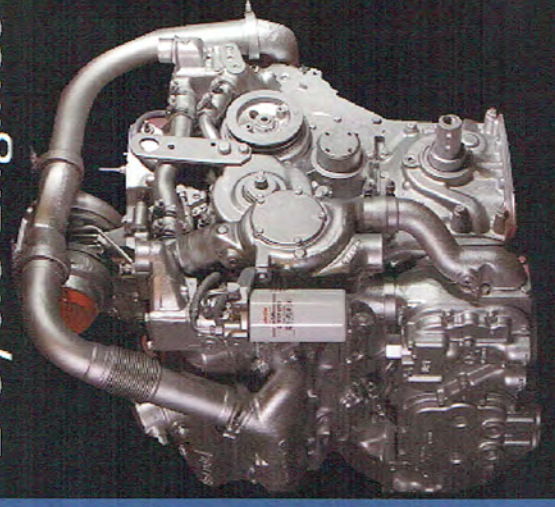

Why Buy American Fleet Inc. Engines

- ~ American Fleet Inc. is a Detroit engine specialist.
 - ~ **American Fleet Inc. is NOT and assembly line manufacturer.** We at American Fleet Inc. are a custom engine manufacturer that uses experienced top pay technicians for 100% of the rebuild.
 - ~ Our remanufactured engines over the years have consistently outperformed our competitors. This is evident with the total number of miles you will get out of service with your engine long after your warranty has expired.
 - ~ We are centrally located in the U.S. 35 miles from Branson, MO.
 - ~ **Nationwide delivery** – 2-3 days by freight companies or our personal delivery trucks at a very low price.
 - ~ **Availability** - most engines will ship within a day or two of placing order.
 - ~ **Applications** - will be matched exactly to your specifications to keep your installation downtime to a minimum.
 - ~ **Dyno Tested engines** – must pass test of horsepower, oil pressure, fuel pressure and water temperature. Oil, water, and fuel systems are tested and inspected for leaks at cold and hot temperatures. All engines will have the overhead tune up adjusted twice.
 - ~ **Warranty support** – warranty card with each engine, with toll free number for after hours support. Can be repaired anywhere in the United States, preferably a Detroit dealership or independent shop that's approved.
 - ~ **100% parts and labor, even if you install it.** No manufacturer is perfect but American Fleet Inc. strives to be as close to perfect as possible, our warranty rate is very low, which means the best warranty is the one you'll never need to use.
 - ~ **Towing** - most other engine manufacturers do not include towing in their warranty. We at American Fleet Inc. feel or believe this is a sign that their warranty rate is high.
- We do pay towing.**
American Fleet believes we have one of the best products money can buy.

Series 60 EGR & NON EGR Engines

2 Cycle Engines

85% of our business is from repeat or referrals of satisfied customers.
